

Fairfield Community School District employees review the new stop signs at Fillmore Avenue and Highway 1 with City of Fairfield Street employee Jeff Giberson (See attached). The new stop signs rotate and will be turned for Highway 1 traffic when the roll-out stop sign is normally in place. The rotating signs are easier for District staff to handle and are taller, making it easier for drivers to see. Both the roll-out stop sign and the rotating signs will be in place through January, allowing time for local drivers to get used to the change. The District paid for the materials while City crews built the devices and install the signs. Excellent Team Work!
